Note: All tables should have columns [TableName]CreatedAt and [TableName]UpdatedAt with associated triggers to handle the population of each. They have been omitted from the data dictionary as their usage and purpose is redundant.

Studio Subset Tables

ChordProgression

Table: ChordProgression

ChordProgressionId
ChordProgressionSignature
ChordProgressionNotes

ChordProgressionSignature is case-sensitive unique, so "i-iv-v" is different from "I-IV-V", necessary to keep minor and major progression signatures from clashing.
